Work Done So Far

Express API

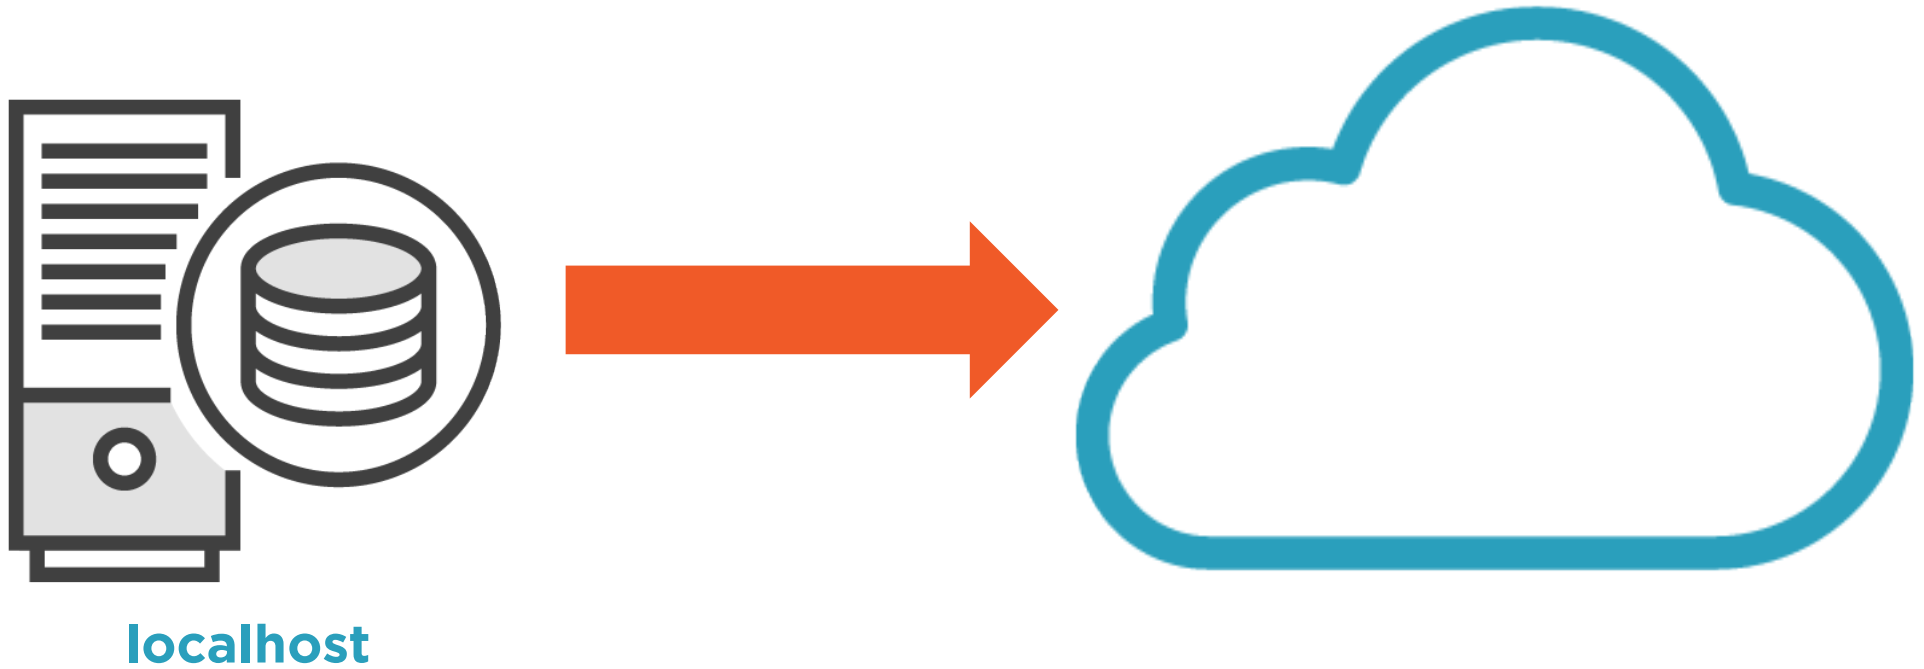

Tested with Postman

MongoDB
(local)

Database Migration

Virtual Standup Meeting

This course was focused on
Mongoose

Other helpful resources

- Vue.js
- Other UI frameworks

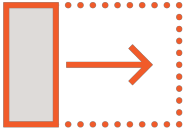

MongoDB

Migrate to the Cloud

Migration Options

Use mongodump / mongorestore

See: docs.mongodb.com/manual/reference/program/

Use cloud-based hosting service migration tools

Use Studio 3T export / import features

Demo

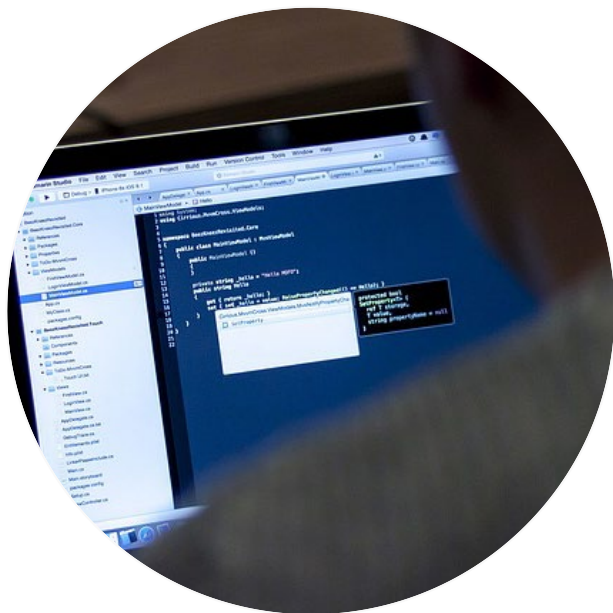

Use Studio 3T

- Export local database collections
- Import collections into the cloud

Review the Client Project

Download the Client Project

github.com/tripletdad99/vue-standupnotes-client

Demo

Change the connection string

- Point to the cloud host now

Review the Vue.js Client Project
